

LUCAS CRUZ

Data Engineer | Gen. AI Engineer

+55 (21) 96552-9308 • dev.lucasacruz@gmail.com • [linkedin.com/in/lucas-cruz](https://www.linkedin.com/in/lucas-cruz) • devzurc.github.io/portfolio

Curitiba, Brazil • Open to relocation across Europe • Requires visa sponsorship

PROFESSIONAL SUMMARY

Data & Gen. AI Engineer with 5+ years of experience spanning scalable cloud solutions, AI-powered automation (LLMs/n8n), and robust Business Intelligence. Proven track record of delivering end-to-end data pipelines, dynamic dashboards, and automated reporting workflows that drastically reduce operational workload. Fluent in English (C1); open to relocation across Europe.

TECHNICAL SKILLS

Gen. AI & LLMs	LLM Integration, AI Agents (OpenAI, Claude, Gemini...), RAG, Prompt Engineering, Chatbot Development
Data Engineering & Orchestration	Python, SQL, Apache Spark (PySpark), Pandas, dbt, Trino, REST APIs, Web Scraping, Parquet, Apache Airflow, n8n
Cloud & Lakehouses	Amazon Web Service (AWS), Microsoft Azure, Google Cloud (GCP), Oracle Cloud (OCI), Snowflake, Databricks, Amazon Redshift, Delta Lake, Oracle Autonomous Database.
Relational Databases & BI	PostgreSQL, SQL Server, MySQL, Power BI, Qlik Sense, Apache Superset, Looker
Security & Data Governance	LGPD/GDPR Compliance, Data Privacy, IAM, RBAC, Data Masking, Encryption (Rest/Transit), Audit Logging, RFID/NFC Tagging, Firewall.
DevOps & Infrastructure	Docker, Kubernetes, Git, CI/CD Pipelines, Linux, Bash Scripting
Languages	Portuguese (Native) • English (C1 – Advanced) • Spanish (B1 – Intermediate)

WORK EXPERIENCE

Gen. AI Engineer – TK Technologies | Curitiba, PR – Brazil (Hybrid)Feb 2026 – May 2026 · Contract

- Engineered a multi-source web scraping pipeline in Python targeting 10+ automotive parts websites, extracting pricing and product metadata at scale to deliver competitive market intelligence.
- Architected AI-powered n8n automation workflows (ETL, RPA, and chatbot agents) by integrating LLMs (Claude AI, Google AI Studio) and GCP APIs (Sheets, Drive) to enrich datasets and boost team productivity.
- Developed a conversational AI chatbot that empowers business users to query and refine pricing datasets via natural language, significantly reducing time-to-insight for non-technical stakeholders.
- Deployed containerised backend services on Azure using Docker, standardising infrastructure environments and improving overall deployment reliability by ~25%.

Data Engineer – Spacecom Monitoramento | Curitiba, PR – Brazil (On-site)Apr 2023 – Jul 2024

- Designed and maintained an enterprise Big Data Lakehouse on AWS S3 leveraging Medallion Architecture (Bronze/Silver/Gold) alongside Delta Lake, Parquet, PySpark, and Trino to support heavy analytics workloads.
- Supported a high-availability IoT platform scaling to 95,000+ devices, efficiently processing hundreds of millions of telemetry records per day.
- Managed electronic security tag (RFID/NFC) data for government court systems, ensuring strict LGPD/GDPR compliance through robust data privacy controls, access governance, and secure handling of sensitive judicial data.
- Orchestrated and optimised ETL pipelines with Apache Airflow, reducing failure rates by ~30%; utilised Docker on AWS EC2 to cut deployment issues by an additional ~25%.
- Remediated inconsistencies in pipeline steps to boost downstream analytics accuracy by ~40%, successfully delivering reliable datasets to Qlik Sense and Apache Superset dashboards.

Data Engineer Consultant – wDiscover | Curitiba, PR – Brazil (Remote)Jun 2022 – May 2024

- Delivered end-to-end data projects across the fintech, agribusiness, and operations sectors by integrating high-volume payment providers (PagSeguro, Stone, Cielo), John Deere IoT APIs, and REST APIs.
- Designed dimensional Data Warehouses on SQL Server and Oracle Autonomous Database; automated complex ETL workflows with Airflow on Docker/Oracle Cloud to reduce manual effort by ~35%.
- Built dynamic Power BI dashboards to track critical KPIs, financial metrics, and operational performance for diverse client domains.

Data Analyst – Itaete Group | Curitiba, PR – Brazil (Hybrid)Jun 2020 – Feb 2023

- Designed a SQL Server Data Warehouse and robust Python/SQL pipelines using Pandas to cleanse, transform, and enrich data from IoT devices, PostgreSQL, APIs, and CSV sources.
- Built Power BI dashboards and automated legacy Excel/VBA reporting workflows, slashing data processing time by ~50% and significantly reducing manual operational workloads.

- Developed internal systems for inventory management and financial automation, streamlining invoice generation and automated weekly report distribution.

NOTABLE PROJECTS

Automotive Market Price Intelligence Platform · Python, n8n, LLMs, GCP APIs, Azure, Docker · *TK Technologies – Feb 2026*

- Scraped 8+ automotive parts sites with Python; orchestrated AI agents via n8n with Claude AI, Google AI Studio, and GCP to automate price analysis. Fully containerised on Azure

Modern Cloud Data Pipeline · Snowflake, dbt, Apache Airflow, Docker · *Personal Project – Jan 2026*

- Built an end-to-end analytics pipeline orchestrating Snowflake and dbt with Apache Airflow. Containerised dbt with Docker, reducing deployment errors by ~50% via modular, tested SQL transformation

IoT Data Lakehouse on AWS – Medallion Architecture · AWS S3, Apache Spark, Delta Lake, Airflow, Trino, Apache Superset · *Client Project – Feb 2024*

- Designed a Bronze/Silver/Gold lakehouse on AWS S3 ingesting from APIs and databases. Virtualised the Gold layer with Trino and surfaced insights via Apache Superset

EDUCATION

Bachelor of Systems Analysis and Development – Dom Bosco University, Curitiba, Brazil – Jun 2023

Majors: Information Systems · Business Analytics · Data Analysis · Database Systems · Software Engineering
