

LUCAS CRUZ

Senior Data Engineer | Gen. AI Automation Engineer

+55 (21) 96552-9308 · dev.lucasacruz@gmail.com · linkedin.com/in/lucas-cruz · devzurc.github.io/portfolio

Curitiba, Brazil · Open to relocation across Europe · Requires visa sponsorship

PROFESSIONAL SUMMARY

Senior Data Engineer and Gen. AI Automation Engineer with 5+ years of experience building production data pipelines, cloud lakehouses, and LLM/n8n automation across IoT, fintech, agribusiness, and automotive intelligence. Proven track record delivering end-to-end data platforms, governed analytics datasets, conversational AI workflows, automated reporting systems, and customer-facing product development and maintenance. Building a public portfolio of production AI platform systems (RAG, agents, evaluation, MCP, observability) over enterprise data through 2026. Fluent in English (C1); open to relocation across Europe.

TECHNICAL SKILLS

Gen. AI & LLMs	LLM Integration, AI Agents (OpenAI, Claude, Gemini...), RAG, Prompt Engineering, Chatbot Development
Data Engineering, APIs & Orchestration	Python, SQL, NestJS, Next.js, FastAPI, SQLAlchemy, Pydantic, Apache Spark (PySpark), Pandas, dbt, Trino, REST APIs, Web Scraping, Parquet, Apache Airflow, n8n, Celery, Redis Streams, Meta Cloud API
Cloud & Lakehouses	Amazon Web Service (AWS), Microsoft Azure, Google Cloud (GCP), Oracle Cloud (OCI), Snowflake, Databricks, Amazon Redshift, Delta Lake, Oracle Autonomous Database
Databases & BI	PostgreSQL, SQL Server, MySQL, Redis, Power BI, Qlik Sense, Apache Superset, Looker
Security & Data Governance	LGPD/GDPR Compliance, Data Privacy, IAM, RBAC, Data Masking, Encryption (Rest/Transit), Audit Logging, RFID/NFC Tagging, Firewall
DevOps & Infrastructure	Docker, Kubernetes, Terraform, Azure Bicep, Azure Container Apps, Git, CI/CD Pipelines, Linux, Bash Scripting
Languages	Portuguese (Native) · English (C1 – Advanced) · Spanish (B1 – Intermediate)

WORK EXPERIENCE

Gen. AI Engineer — TK Technologies

Curitiba, PR – Brazil (Hybrid) · Feb 2026 – Present · 6-month contract, expected Aug 2026

- Architected an omnichannel AI CRM platform (integrating WhatsApp, Instagram, Facebook, Telegram, and Email) with role-based data governance, Meta/Google Ads tracking, and LLM-powered auto-replies, deploying to Azure Container Apps with Bicep IaC.
- Engineered a multi-source web scraping pipeline in Python targeting 10+ automotive parts websites, extracting pricing and product metadata at scale to deliver competitive market intelligence.
- Architected AI-powered n8n automation workflows (ETL, RPA, and chatbot agents) by integrating LLMs (Claude AI, Google AI Studio) and GCP APIs (Sheets, Drive) to enrich datasets and reduce manual analysis work.
- Developed a conversational AI chatbot that empowers business users to query and refine pricing datasets via natural language, reducing time-to-insight for non-technical stakeholders.

- Coordinated Notion-based delivery sprints, customer-facing demos, product training, sales support, and post-launch support; currently contribute to a new TK web presence and ongoing CRM product development and maintenance using public-safe delivery descriptions.

Data Engineer — Spacecom Monitoramento

Curitiba, PR – Brazil (On-site) · Apr 2023 – Jul 2024

- Designed and maintained an enterprise Big Data Lakehouse on AWS S3 leveraging Medallion Architecture (Bronze/Silver/Gold) alongside Delta Lake, Parquet, PySpark, and Trino to support heavy analytics workloads.
- Supported a high-availability IoT platform scaling to 95,000+ devices, efficiently processing hundreds of millions of telemetry records per day.
- Managed electronic security tag (RFID/NFC) data for government court systems, applying LGPD/GDPR-aligned privacy controls, access governance, and secure handling of sensitive judicial data.
- Orchestrated and optimised ETL pipelines with Apache Airflow to improve pipeline reliability; utilised Docker on AWS EC2 to reduce deployment issues.
- Remediated inconsistencies in pipeline steps to improve downstream analytics consistency, delivering reliable datasets to Qlik Sense and Apache Superset dashboards.

Data Engineer Consultant — wDiscover

Curitiba, PR – Brazil (Remote) · Jun 2022 – May 2024

- Delivered end-to-end data projects across the fintech, agribusiness, and operations sectors by integrating high-volume payment providers (PagSeguro, Stone, Cielo), John Deere IoT APIs, and REST APIs.
- Designed dimensional Data Warehouses on SQL Server and Oracle Autonomous Database; automated complex ETL workflows with Airflow on Docker/Oracle Cloud to reduce recurring manual effort.
- Built dynamic Power BI dashboards to track critical KPIs, financial metrics, and operational performance for diverse client domains.

Data Analyst — Itaete Group

Curitiba, PR – Brazil (Hybrid) · Jun 2020 – Feb 2023

- Designed a SQL Server Data Warehouse and robust Python/SQL pipelines using Pandas to cleanse, transform, and enrich data from IoT devices, PostgreSQL, APIs, and CSV sources.
- Built Power BI dashboards and automated legacy Excel/VBA reporting workflows, shortening data processing time and reducing manual operational workloads.
- Developed internal systems for inventory management and financial automation, streamlining invoice generation and automated weekly report distribution.

NOTABLE PROJECTS

Omnichannel AI CRM Platform

NestJS, Next.js, PostgreSQL, LLMs, Meta & Google Ads APIs, Azure Container Apps, Docker · TK Technologies – Jun 2026 – Present

- Built a secure omnichannel CRM integrating WhatsApp, Instagram, Facebook, Telegram, and Email into a unified inbox with role-based access control (RBAC).
- Connected Meta and Google Ads performance data to a unified marketing view.
- Layered LLMs (Claude/Google AI Studio) for smart auto-replies, outbound messaging assistance, and automated ad campaign analysis; contribute to the related TK web presence and product maintenance using sanitized public descriptions.

Automotive Market Price Intelligence Platform

Python, n8n, LLMs, GCP APIs, Azure, Docker · TK Technologies – Feb 2026 – Present

- Built a dual-pipeline platform for public price research and internal stock lookup, using FastAPI/Celery/Playwright/Redis/PostgreSQL/n8n to deliver auditable reporting and notifications. Containerised services run on Azure with Bicep infrastructure-as-code.

IoT Data Lakehouse on AWS – Medallion Architecture

AWS S3, Apache Spark, Delta Lake, Airflow, Trino, Apache Superset · Client Project – Feb 2024

- Designed a Bronze/Silver/Gold lakehouse on AWS S3 ingesting from APIs and databases. Virtualised the Gold layer with Trino and surfaced governed datasets through BI dashboards.

AI Platform Engineering Portfolio (in progress — 2026)

FastAPI · PostgreSQL/pgvector · LangGraph · MCP · RAGAS · Docker · OpenTelemetry

- Building public, production-grade AI systems over enterprise data: RAG with hybrid retrieval and evaluation gates, LangGraph agent orchestration with human approval, MCP tool servers, and observability. Milestones shipping Jul–Dec 2026 on github.com/devzurc.

EDUCATION

Bachelor of Systems Analysis and Development — Dom Bosco University, Curitiba, Brazil · Jun 2023

Majors: Information Systems · Business Analytics · Data Analysis · Database Systems · Software Engineering

LICENSES & CERTIFICATIONS

- AI for Writing and Communicating — Google (Credential ID: HE8YE5IS7WVW) · Jul 2026
- AI for Research and Insights — Google (Credential ID: 4PZDF3XQOF55) · Jul 2026
- AI for Brainstorming and Planning — Google (Credential ID: 7SFW2HGOKIU5) · Jul 2026
- AI Fundamentals — Google (Credential ID: UKBGM0AZUIS2) · Jul 2026
